

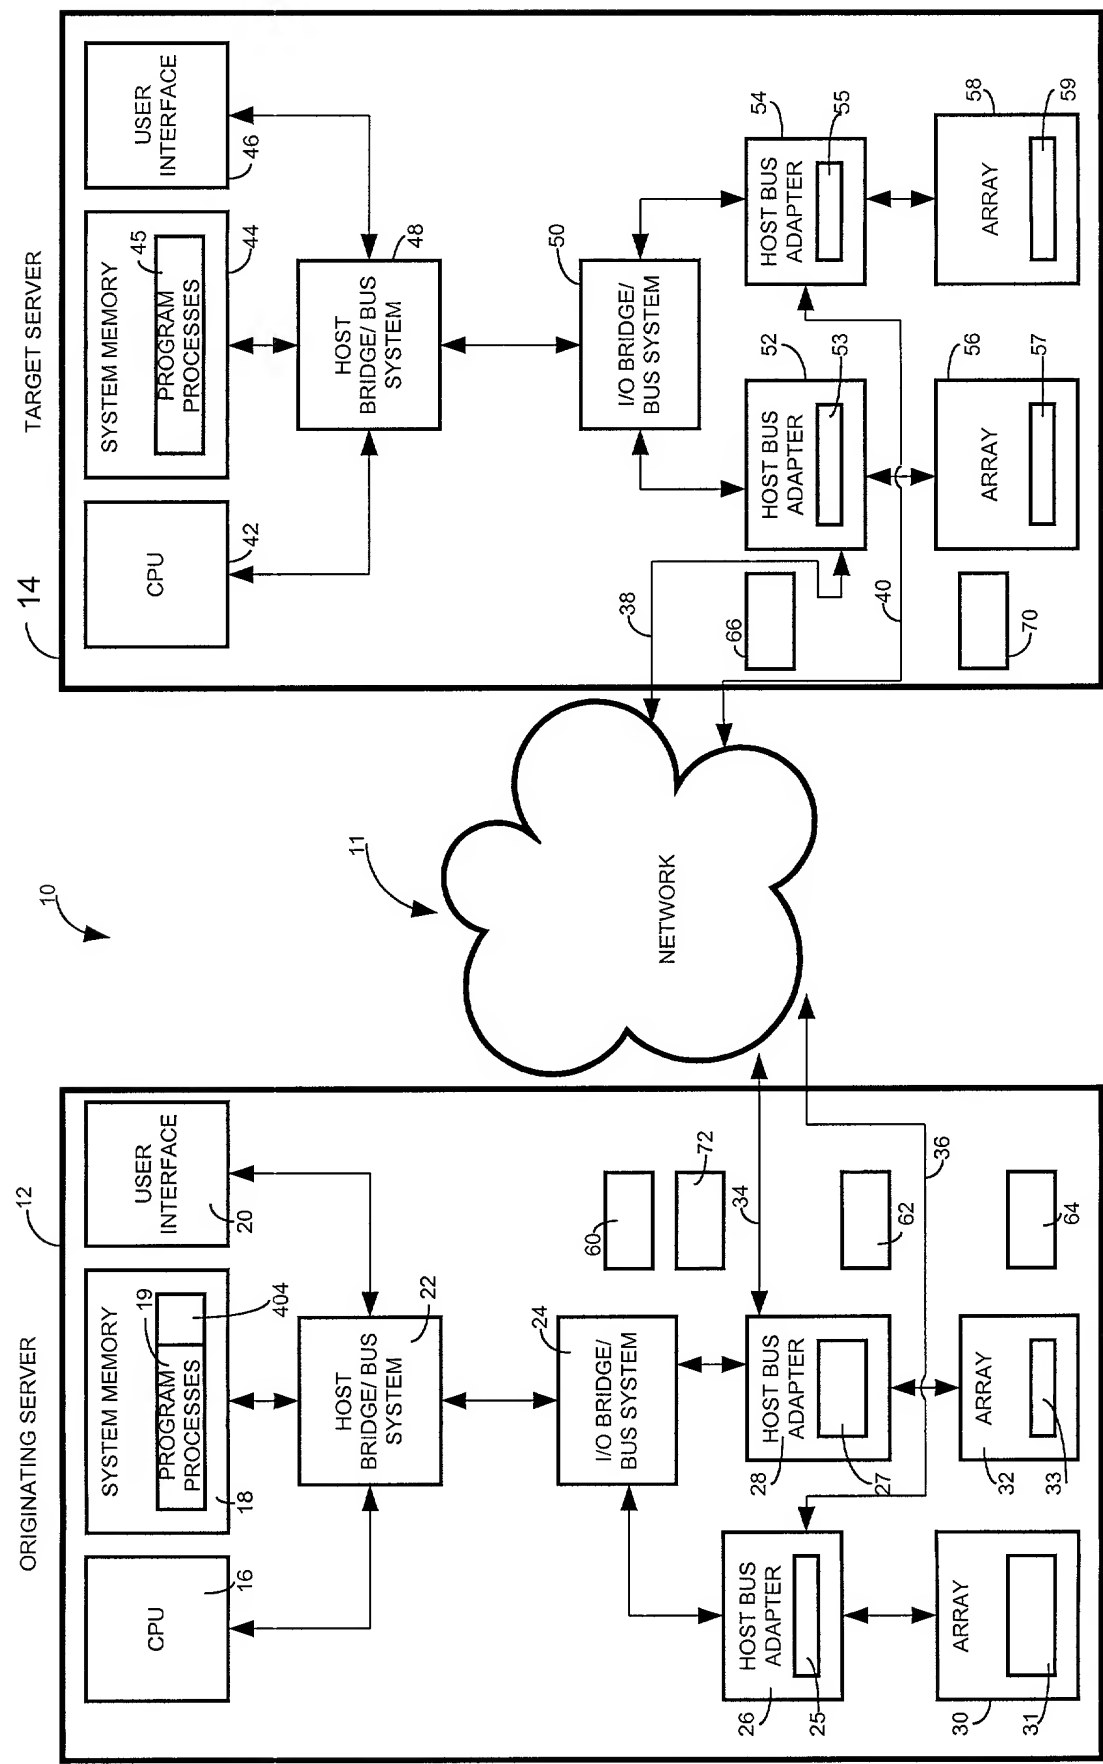

FIG. 1

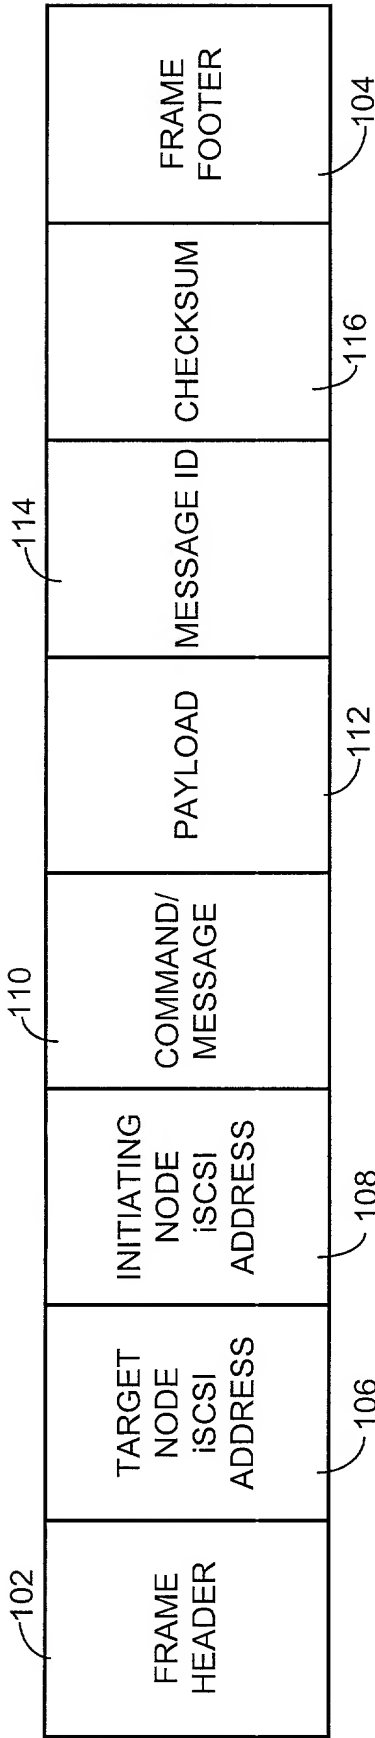

FIG. 2

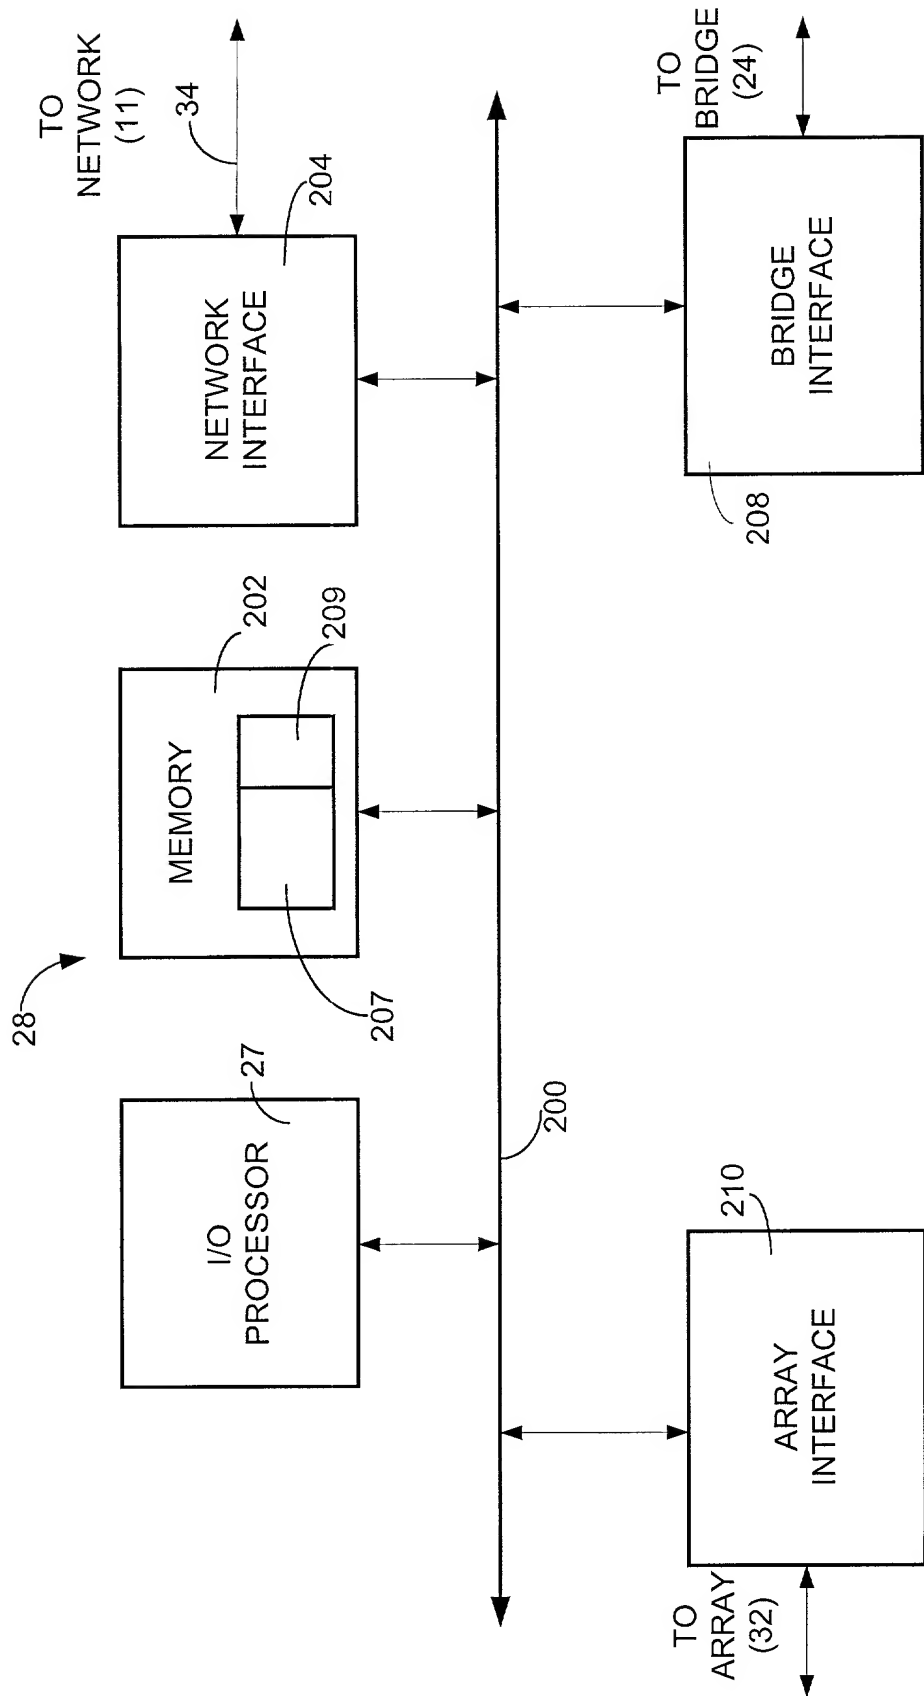

FIG. 3

FIG. 4 is a block diagram of a system 45. The system 45 includes a processor 300 and a memory 310. The processor 300 is connected to the memory 310. The system 45 is configured to execute a program stored in the memory 310. The program includes instructions for performing a method. The method includes steps for receiving data, processing the data, and outputting the results. The system 45 may be implemented as a computer system, a mobile device, or a networked system. The system 45 may be configured to interface with other systems or devices. The system 45 may be configured to perform various tasks, including data processing, communication, and control. The system 45 may be configured to be part of a larger system or network. The system 45 may be configured to be used in various environments, including office, home, and industrial settings. The system 45 may be configured to be used by various users, including individuals and organizations. The system 45 may be configured to be used for various purposes, including research, development, and production. The system 45 may be configured to be used in various ways, including as a standalone system or as part of a larger system. The system 45 may be configured to be used in various locations, including on-premises and off-premises. The system 45 may be configured to be used in various time periods, including during the day and at night. The system 45 may be configured to be used in various weather conditions, including sunny, cloudy, and rainy. The system 45 may be configured to be used in various environments, including indoor and outdoor. The system 45 may be configured to be used in various settings, including formal and informal. The system 45 may be configured to be used in various ways, including as a tool and as a resource. The system 45 may be configured to be used in various locations, including on-premises and off-premises. The system 45 may be configured to be used in various time periods, including during the day and at night. The system 45 may be configured to be used in various weather conditions, including sunny, cloudy, and rainy. The system 45 may be configured to be used in various environments, including indoor and outdoor. The system 45 may be configured to be used in various settings, including formal and informal. The system 45 may be configured to be used in various ways, including as a tool and as a resource.
